ILO's Social Protection Monitor: Tracking Climate Change Trends in News

2023

Part I - Adaptation, resilience and loss and damage

▶ **India: Rented accommodation assistance to families in Uttarakhand**

06/01/2023 – Families in unsafe areas where land subsidence has left gaping cracks in structures and roads were evacuated. They will be provided with assistance of 4000 Indian rupees per month for the next six months to be spent with rented accommodation. [Read more](#)

▶ **India: Cash assistance to farmer's families affected by droughts**

11/01/2023 – Jharkhand is reeling under drought due to scanty rainfall this year. Due to lack of rain, the farmers have suffered a lot. In view of this, 3,500 rupees per farmer's family is being provided as assistance to the farmer's family by the State Government. [Read more](#)

▶ **Philippines: Emergency financial assistance to families of people who died in floods**

11/01/2023 – The Department of Social Welfare and Development (DSWD) announced that it has already provided at least 2.5 million Philippine pesos in humanitarian assistance to over 44,000 flood victims in Mindanao last month. Financial assistance of 10,000 pesos per family was also granted to the families of four people who died in flash floods. [Read more](#)

▶ **Madagascar: Expansion of safety net services to promote greater resilience to climate shocks**

06/02/2023 – The World Bank approved a US\$250 million credit to aid the Government of Madagascar in a 4-year project that will span all 23 regions of Madagascar, benefiting at least 3 million people of the extremely poor households. It includes human development cash transfers, productive cash for work activities, and rapid responses to shocks. [Read more](#)

▶ **United States: Parametric flood insurance scheme for the NYC's low-income families**

06/04/2023 – The parametric flood insurance was launched as a pilot that could serve as a blueprint for greater take-up. The program provides up to US\$1.1 million in emergency funding following a major flood event. Qualifying households could receive up to US\$15,000 under the pilot, which will run for a 12-month trial period beginning February 2023. [Read more](#)

▶ **Pakistan: Special relief package for people affected by natural disasters**

12/06/2023 – A special package was announced for those who died in the heavy rains in the Khyber Pakhtunkhwa province. The government said that 1 million Pakistani rupees would be given to each family of the deceased, while each seriously injured person would get 0.3 million rupees. Also, 50,000 rupees would be given to those who had suffered minor injuries. [Read more](#)

▶ **Morocco: Expansion of the health coverage of farmers exposed to climate-induced health risks**

13/06/2023 – The World Bank approved a US\$350 million loan to support Morocco's moves to combat the worsening impacts of climate change. The program aims to enhance the climate resilience of vulnerable people and ecosystems. It will contribute to expanding the health coverage of farmers and family members, who are disproportionately exposed to climate-induced health risks. [Read more](#)

▶ **India: Financial assistance provided to flood-affected families**

17/07/2023 – The water level of the Yamuna River in Delhi has surpassed the danger mark. The ongoing waterlogging situation persists in various parts of the capital. To aid the flood-affected families, the government announced financial assistance of 10,000 rupees per family. [Read more](#)
